Research Interests

My work lies at the intersection of biology, machine learning, and statistical modeling. I develop data-driven algorithms to model T cells interactions with cancer cells, with the aim of expediting personalized cancer immunotherapies. Previously, I used statistical physics-inspired methods to model protein structures, evolution and interactions from their amino acid sequences.

Positions

JAN 2020 - CURRENT
LAUSANNE (SWITZERLAND)

Postdoctoral Researcher

Marie Skłodowska-Curie Individual Fellow [MT-PoINT project](#)

University of Lausanne - Ludwig center for cancer research
Computational Cancer Biology Lab - [David Gfeller Lab](#)

OCT 2016 - OCT 2019,
PARIS (FRANCE)

Ph.D. Fellow

Sorbonne University, Computational and Quantitative Biology Lab ([LCQB](#))

Thesis: [Towards a genome-scale coevolutionary analysis](#)

Supervisor: Martin Weigt. Co-supervisor: Olivier Tenaillon

Education

SEP 2014 - JUN 2016,
PARIS (FRANCE)

MSc in theoretical and statistical physics

École Normale Supérieure, Paris,

- M2 thesis: *Out of equilibrium dynamics of spin glass models*

Supervisor: Cristina Toninelli

- M1 thesis: *Adaptive Cluster expansion for Ising model*

Supervisors: Simona Cocco, Francesco Zamponi

SEP 2011 - JUL 2014,
PAVIA (ITALY)

BSc in physics

Thesis: Symmetries in quantum mechanics, Casimir Operators

Supervisor: Prof. Claudio Dappiaggi

Publications

Grants and awards

Jul 2021 - Jul 2023 Marie Skłodowska-Curie Individual Fellowship 2020 for the [MT-PoINT](#) (Motif in T cells for the Prediction of INTERactions) project at the interface between data science and immunology

Apr 2020 - Jun 2021 Sorbonne University - SU-COVID19-FSI project: Data-driven models of SARS-CoV-2 sequences: Mutational effects, selective constraints, and potential drug targets

Jan 2019 - Mar 2019 Visiting researcher at University of L'Havana (Cuba) funded by the [INFERNET](#) project: new algorithms for inference and optimization from large-scale biological data

Oct 2016 - Nov 2019 Ph.D. grant funded by *Labex Calsimlab - Data, computing and simulation*. Calsimlab is a cluster of excellence for research (PIA2 laboratoires d'excellence)

Sep 2014 - Jun 2016 Two-years master scholarship funded by ICFP-ENS Labex.

The ICFP-ENS master is specifically intended for international students wishing to obtain a first-class education in physics

Sep 2011 - Sep 2014 Student at Collegio Ghislieri - a 450-year-old Italian institution - that is committed to providing housing and financial support to students enrolled at the University of Pavia.

Recent talks

Set 2023 - Basel (Switzerland)

Basel Computational Biology Conference - Big data in biology promises and challenges

April 2023 - Antwerp (Belgium)

The Third Antwerp TCR meeting - international experts discuss T cells from the TCR perspective.

April 2023 - Lausanne (Switzerland)

Biological Evolution Across Scales: Mathematical modeling and statistical inference

Aug 2022 - Cargese (France)

Physics and Computation in Immunology

Jun 2022 - Paris (France)

QBIO-IARANA Innate and Adaptive Recognition of Antigens and Neoantigens

Students

Jan 2020 - Sep 2020 Richie Yat-Tasi Wan - M2 Master Project. Now PhD student at the Technical University of Denmark

Jan 2022 - Jan 2023 Daniel Hafez - M2 Master Project.

Jun 2023 - Sep 2023 Animesh Awasth - Undergraduate student (The School of Biology Summer Undergraduate Research Programme). Now PhD student at the Medical University of Vienna

Teaching

Dec 2021 - Introduction to Cancer Genomics - PhD class

Sep-Nov 2022 - introduction to clinical bioinformatics

Sep-Nov 2023 - introduction to clinical bioinformatics

Reviewing activities

Reviewer for Bioinformatics, Immunoinformatics, Plos ONE, Nature Methods, Nature Biotechnology, Cell Genomics
